Relevant Experience

BNY Mellon | Pershing— Lead Software Developer

June 2016 - PRESENT

- Led the development of a search **component** that is used by **over 10 teams and components** across our entire platform
- Contributed to the development of an internal Angular framework built from **Angular libraries** used by every Front-End system in our company
- Technical Lead for an internal tool built in Angular for calculating loan amounts used by **100 + users**
- Contributed to the development of **Spring Boot microservices** used in sync with our Front-End Angular libraries
- Took **leadership** in creating diagrams and developing components for complex financial business requirements
- Worked with a component sharing module to develop and deploy multiple components under one **portal** using **SystemJs**
- Developed web applications in **Dojo** by implementing grids and custom widgets
- Enhanced user experience by implementing **adaptive and ADA** friendly components
- Wrote unit tests for front end and server side code with tools such as **Karma, Jasmine** and **JUnit**
- Emphasized code scalability and consistency across team members during dev reviews
- Implemented CSRF and XSS security measures to applications and wrote guides for them

Achievements

- **Received great reviews from clients/users such as:**
  - "The best thing since sliced bread, what would have been a complicated email to Corporate Executive Services is now a quick evaluation with detailed explanation."
  - "Works beautifully, this application is life changing!"
- **Consistently Exceeded expectations across all 4 years at BNY Mellon for the annual performance review**

Skills

Programming Languages

JavaScript (ES6), TypeScript, HTML, CSS, Java, Python
